# NETWORK TRAFFIC SIMULATION

Betascript Publishers Dez 2009, 2009. Taschenbuch. Book Condition: Neu. 222x149x15 mm. Neuware - Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Network traffic simulation is a process used in telecommunications engineering to measure the efficiency of a communications network. Telecommunications systems are complex real-world system, containing many different components which interact, in complex interrelationships. The analysis of such a system can become extremely difficult: modelling techniques tend to...
